

**Jeffrey A. Kramer**  
15803 Bear Creek Pkwy Apt. E-513  
Redmond, WA 98052

847-997-9410 (mobile)  
jeffkramr@gmail.com  
<http://mind-melt.com>

## Qualifications

- Successfully designed, built, and deployed a subsea datacenter in about a year
- Rebuilt Holoportation to fit into a moving vehicle
- Designed and built several robotic and autonomous systems, for both commercial and government clients
- Management experience in military, medical, and private industry research, as well project design and development
- Lead author of *Hacking the Kinect*, as well as a published author in multiple academic and industry publications
- Master of Science in Computer Science and Bachelor of Science in Electrical Engineering

## Specialized Qualifications

- Academic: Mobile Robotics, Computer Vision (3D and 2D), Artificial Intelligence, Machine Learning, Control Systems, Neural Networks, Distributed Systems, Mathematical Filters, Sensor Fusion, Autonomous Vehicles
- Technical: Go, Python, TSDB, SQL, C/C++, Java, Assembler, Ladder, Embedded Systems

## Experience

**Technical Adviser**  
Vulcan Inc.

Seattle, WA  
Sept. 2017 - Present

- Technical Adviser to Paul Allen
  - Technical oversight and review of over 20+ projects at Vulcan Inc. and the Allen Institutes. Daily interaction with the senior leadership team
  - Problem solving across a broad domain - everything from drones to stop poachers in Africa to satellite systems to halt illegal fishing from cell science to artificial intelligence
  - Ideation and rapid prototyping of hardware and software products

**Senior Member of Technical Staff**  
Microsoft Research

Redmond, WA  
Aug. 2014 - Sept. 2017

- Engineering and Program Management for Project Natick (<http://projectnatick.com/>)
  - Designed and built a subsea datacenter
  - Solved problems at every level of the stack - from hardware and software to thermal physics models to marketing and promotion
  - Worked with and helped manage a large number of contractors to deliver the project on time
  - Developed and executed rapid experiments to test solutions to difficult problems
  - Proved a variety of alternative cooling schemes for a subsea datacenter
  - Architected and implemented a cloud connected, high speed sensor network for system health and control
  - Successfully troubleshooted difficult problems with the implementation of the vessel in the process of building the system
  - Designed and built the Project Natick website, as well as participated in all aspects of marketing and launch

- Engineering for Holoportation
  - Rebuilt Holoportation to fit into a vehicle
  - Reduced bandwidth requirements by 97%
  - Reduced required onboard computation from seven machines to one
  - Built custom hardware and systems to support in-vehicle Holoportation

**Consultant**

Lightning Dynamics

Redmond, WA  
September 2011 - Present

- Developer of Computer Vision Systems and Algorithms
  - Built multiple systems for independent commercial projects
  - New product development for multiple Fortune 500 companies
  - Developed demo applications and proof of concept works
- Project Manager and Developer for Pipe Rupture and Gas Flow Simulations
  - Managed small team to develop project to specification
  - Developed software for a numerical method of simulation
  - Handled budgeting and financial accountability of the project

**Lead Robotics Engineer**

MTD Products

Valley City, OH  
Apr. 2013 - Jul. 2014

- Software and Electrical Team Lead on autonomous lawnmower project
  - Led software and electrical product design for autonomous robot system, with five direct reports
  - Worked in a crossfunctional group to design a product using privileged consumer insights
  - Interfaced with stakeholders and suppliers to drive requirements and system choices
  - Built system requirements from focus group and consumer event interactions
  - Designed the software and hardware architecture from the ground up, from embedded systems to the cloud
  - Wrote advanced robot simulation software for test, validation, and analysis
  - Performed sensor system design and analysis

**Senior Robotacist**

Deeplocal

Pittsburgh, PA  
Dec. 2012 - Mar. 2013

- Creative coding and design for multiple clients
  - Designed innovative experiences for major brands
  - Implemented prototypes of experiences
  - Addressed proposals and technology feasibility requests with both advertising agencies and brands
  - Made successful pitches to brands and agencies, including Google

**Cofounder**

Spark Inc.

Pittsburgh, PA  
Feb. 2012 - Nov. 2012

- Cofounder and Technology Lead
  - Led development of cross-platform interactive motion API
  - Designed and implemented gesture recognition systems
  - Created technology demonstrations utilizing the Microsoft Kinect SDK
  - Wrote business plans and models for art and education markets
  - Interviewed customers to better make product choices

**Research Programmer**

NREC - National Robotics Engineering Center

Pittsburgh, PA

Oct. 2010 - Dec. 2012

- Research Programmer for multiple robotics projects
  - Hybrid Safety System (HSS) - industrial robot safety system to allow humans and robots to work in close proximity
  - Automated Hauling System (AHS) - autonomous driving for 38 ton mining trucks
  - ACRS - stripping paint from military planes with high powered lasers mounted to giant, mobile robot arms
  - Perception, sensor fusion, and occupancy probability
  - Self-driving vehicles and obstacle detection
  - Testing and verification for sensors and systems

**Engineering Research Assistant**

iSSRT - Institute for Safety, Security, and Rescue Technologies

Tampa, FL

Aug. 2005 - Aug. 2008

- Research assistant on engineering projects while continuing my graduate education in Computer Science, including:
  - Robot testing and verification
  - Design and development of a 3D laser range finder
  - Optic flow for obstacle avoidance
  - Fuzzy sensor fusion for navigation and control
  - Design and development of an unmanned surface vehicle (SeaRAI)
  - Adaptive sensor fusion for robot localization

**Consultant**

Yaskawa Electric America

Lake Forest, IL

Aug. 2004 - Dec. 2004

- Developed patented method for industrial machines
  - Responsible for all aspects of design and development
  - Task was thought to be impossible by industrial partners and internal to Yaskawa
  - Resulted in patent US20080082206 and a successful motion control product - Synchbelt

## Education

### University of South Florida

Master of Science in Computer Science

Tampa, FL

Aug. 2005 - May 2010

- Thesis: Accurate Localization Given Uncertain Sensors

### University of Illinois at Urbana-Champaign

Bachelor of Science in Electrical Engineering

Urbana, IL

Aug. 2000 - May 2004

- Senior Project: Quantum Cryptography Randomization Engine

## Publications

- 2017** • B. Cutler, S. Fowers, J. Kramer, E. Peterson. “Dunking the Datacenter”. In *IEEE Spectrum*, March 2017
- 2016** • B. Cutler, N. Whitaker, S. Fowers, J. Kramer. “Artificial reef datacenter”. *Patent US20160381835A1*, filed May 2016
- 2012** • J. Kramer and A. Kandel. “On Accurate Localization and Uncertain Sensors”. In *International Journal of Intelligent Systems*, May 2012
